

## TECHNICAL SPECIFICATION

### Analogue (pointer) panel voltmeters SD72 type for build-in

Analogue devices adjusted for mounting on the front panel of electrical boards. Designed for frequency measurement, capacity, alternating or direct voltage and current of the power supply grid, with overall dimensions 72x72mm. They are manufactured on the basis of bridge measurement schemes. There is possibility for display change for the higher scopes of measuring.

### Variants

Type	Type of the measurement system	Precision class	Range	Packing / Box (pcs)	Catalogue number
voltmeter AC*	MEMSI	1.5	0-500V	1 / 50	50125
voltmeter DC	MEMC	1.5	0-50V	1 / 50	50130
voltmeter DC	MEMC	1.5	0-100V	1 / 20	50131

**Note:** MEMSI - magnetic-electrical movable steel instrument, MEMC – magnetic-electrical movable coil

\* Possibility for supplying with voltage transformer X/100V for range expanding

**Standards:**

EN 60051-1:1998
